**Subject:** Microsoft Case Opinion

I sit here dumbfounded at how this corporation has managed to totally subvert the legal process and buy it's clemency. The recent judgment is anything but. The farce of this verdict rivals that of the O. J. Simpson case.

This company, this monopoly has broken the law, repeatedly, knowingly, continually. They have made mockeries of past legal judgments against tem. They have lied in court.

The recent suggestion that they make amends by donating software to schools is a final slap in the face. It is like a convicted heroin dealer asking for lenience if he provides the drugs free to school children for X number of years. Just hoe pervasive is the influence of this man Gates?

This corporation needs to be disempowered. Their monopoly of the computer software industry in the US (and worldwide) hurts all of us, daily. Please have the courage and integrity to do the right thing. Stop Microsoft from its parasitic drain on innovation and progress.
